SUMMARY

Computer Engineering student with a strong interest in Cybersecurity, DevOps, and Cloud Computing. Passionate about securing systems, automating infrastructure, and building reliable applications. Experienced with Linux, Docker, networking, and security fundamentals through academic and personal projects. Always eager to learn new technologies and gain hands-on experience.

EXPERIENCE

Internship - Cybersecurity

Jul 2026 - Aug 2026

National Agency for Computer Security · Hybrid

- Architected a secure SIEM/SOAR pipeline (Project CyberThread) using Wazuh and n8n to automate threat detection, payload transformation, and incident alerting.
- Integrated continuous security monitoring by deploying and configuring Wazuh agents to ingest, parse, and analyze real-time endpoint telemetry.

Internship - Cybersecurity

July 2024 - Aug 2024

The Computer Center of the Ministry of Finance · Hybrid

- Employed security tools including Kali Linux, Wireshark, Nmap, and Hydra for comprehensive security assessments.
- Performed network traffic analysis and identified vulnerabilities to enhance system security.
- Assisted in the detection and mitigation of security threats, contributing to overall cybersecurity posture.

Internship - Academic Support (Tutoring)

July 2024 - Aug 2024

Coworking Space · On-site

- Designed and developed interactive programming courses tailored for baccalaureate students.
- Developed educational materials and recorded explanatory videos.

EDUCATION

National Engineering School of Carthage

2024 - Present

Engineering Cycle in Computer Engineering

Preparatory Institute of Monastir

2022 - 2024

Scientific Preparatory Class (MP)

Pioneer High School Monastir

2022

Baccalaureate in Mathematics

SKILLS

Languages: Python, Java, C, C++

Frameworks/Libraries: Angular, PyTorch, Node.js

Tools & Platforms: Git

Cloud & DevOps: Docker, Jenkins

Networking & Protocols: Wireshark

Security & SIEM: Metasploit, Burp Suite

Other Technical Skills: Springboot, React.js, Figma, Kali, Crypto
